Professional Statement

Step One: Strengths

- Strong foundation in programming
- Commitment to continuous learning

Step Two: Values

- Protecting not only organizations but also the people affected by cyber threats
- Contributing to a safer and more secure internet, especially within the organizations where I work

Step Three: Interest in Cybersecurity

- What interests me most about cybersecurity is understanding the internet and technology from their foundations. Many attacks and vulnerabilities are connected to fundamental aspects of computing, so studying networks, protocols, and communication systems is particularly engaging to me. I believe that my programming background, commitment to continuous learning, and focus on protecting both organizations and people can help support stronger security practices and reduce cyber risks.

Professional Statement

- I am an aspiring cybersecurity professional with a strong foundation in programming and a commitment to continuous learning. I am passionate about understanding the fundamental technologies behind the internet, including networks, protocols, and communication systems, to help identify and reduce security risks. I value protecting both organizations and people and aim to contribute to safer, more secure digital environments.
